

Influencer - Based Social Media Management Platform

Product Overview

This web application is an **all-in-one influencer marketing & social media management platform** that helps businesses:

- Manage influencers
- Run influencer campaigns
- Schedule & approve content
- Track social media performance
- Automate messaging & marketing
- Measure ROI from influencer campaigns

The platform is designed for **brands, agencies, and influencer-based businesses** operating mainly in the **UK & EU market** (GDPR-compliant).

User Roles & Permissions

2.1 Admin Role (Business / Agency)

Capabilities:

- Manage influencers & campaigns
- Approve / reject influencer content
- Connect & manage social media accounts
- View full analytics & ROI
- Manage influencer payments & earnings
- Configure marketing automation
- Communicate with influencers
- Monitor campaign performance in real time

2.2 Influencer Role

Capabilities:

- Manage personal profile
- Connect social media accounts
- View assigned campaigns
- Submit posts/content for approval
- Track engagement metrics
- View earnings & payment history
- Communicate with Admin

Core Modules & Features

3. Admin Panel – Features
