

MONDIAL.ECO

Creator Experience

Master Product, UX & Antigravity Implementation Specification

একটি complete Single Source of Truth — যাতে একই কাজ বারবার explain করতে না হয়

Document role	Single Source of Truth
Version	1.1
Primary agent	Antigravity
Explanation language	Bangla + English mix
Platform visible content	English only

এই document এবং supplied reference files একসাথে Antigravity-কে দিন। Document-এ defined requirement user-কে পুনরায় জিজ্ঞাসা করা যাবে না।

Prepared for Mondial.eco • June 2026

Document Map

এই map থেকে Antigravity এবং development team document-এর required section দ্রুত locate করতে পারবে।

Section	Topic
0	এই Document কীভাবে ব্যবহার করতে হবে
1	Project Goal
2	Supplied References এবং Source Priority
3	Product Architecture — Two Connected Layers
4	Creator Journey Overview
5	Phase 1 — Universal Gate
6	Shared Journey State Engine
7	Global Page State System
8	New Creator Dashboard Overview
9	Existing Sidebar & Route Preservation
10	Phase 2 — Project Identity
11	My Idea Workspace Logic
12	Project Studio Logic
13	Phase 3 — Project Intelligence
14	AI Masterplan Workspace Logic
15	Phase 4 — Offer & Resource Setup
16	Phase 5 — The Strategic Crossroads
17	Phase 6 — Smart Matching
18	Route-to-Phase Access Matrix
19	Cross-Page Data Propagation
20	History & Versioning Rules
21	Asset Library & Documents
22	Messenger Integration
23	Notification Logic
24	English Platform Copy Library
25	Design & UX Rules
26	Data Integrity & Security Rules
27	Antigravity Implementation Plan
28	Coding & Delivery Rules for Antigravity
29	Required Test Scenarios
30	Acceptance Criteria — Definition of Done
31	Image Reference Mapping

Section	Topic
32	Master Instruction to Paste into Antigravity
33	Final Product Principle

0. এই Document কীভাবে ব্যবহার করতে হবে

এই file-টি হলো complete master instruction। Antigravity-কে কাজ বোঝানোর জন্য user-কে প্রতিবার নতুন করে পুরো flow explain করতে হবে না। Antigravity প্রথমে এই document সম্পূর্ণ read করবে, তারপর existing codebase এবং supplied references audit করবে, এবং এই specification অনুযায়ী task-by-task implementation করবে।

Antigravity Working Rule

1. এই document read না করে code change করা যাবে না।
2. কোনো requirement already এই document-এ defined থাকলে user-কে আবার একই question করা যাবে না।
3. শুধুমাত্র সত্যিকারের blocking conflict থাকলে clarification চাইতে হবে।
4. Codebase-এর existing stack preserve করতে হবে। সুবিধার জন্য framework migration করা যাবে না।
5. Existing useful page delete করা যাবে না।
6. Visual-only prototype নয়; navigation, state, resume, lock, history এবং persistence কাজ করতে হবে।
7. প্রতিটি task শেষে changed files, completed behavior, remaining issues এবং test result report করতে হবে।

Language Rule — Non-Negotiable

এই document-এর explanation Bangla + English mix হবে যাতে founder সহজে বুঝতে পারে। কিন্তু platform-এর user-facing content অবশ্যই English হবে। যেমন:

- Button labels: English
- Page titles: English
- Error messages: English
- Empty-state messages: English
- AI questions: English
- Notification text: English
- Tooltips: English

Code comments English হতে পারে। Variable, route, database field এবং API naming English হবে।

1. Project Goal

Mondial.eco Creator experience-কে এমনভাবে build করতে হবে যাতে একজন Creator signup থেকে verification complete করে, phase-by-phase guided setup follow করে, এবং তার completed work dashboard workspace-এ organized history হিসেবে দেখতে পারে।

এই system-এর মূল উদ্দেশ্য:

- Creator-এর idea clear করা
- Idea না থাকলে AI দিয়ে suitable idea discover করা
- Project identity এবং branding তৈরি করা
- Financial forecast এবং business plan তৈরি করা
- Legal, compliance এবং skill-gap বুঝানো
- Pricing, resources এবং GTM plan তৈরি করা
- Creator-কে final strategic decision নিতে সাহায্য করা
- Idea sell/full buyout করা অথবা company build/co-founder-equity path নেওয়া
- Correct path অনুযায়ী buyer বা investor matching unlock করা

এটি শুধু onboarding wizard নয়। এটি একটি connected Creator Operating System যেখানে guided setup এবং dashboard history একই shared data ব্যবহার করবে।

2. Supplied References এবং Source Priority

এই project-এ এখন তিনটি implementation reference এবং একটি master logic reference আছে। Antigravity-কে প্রত্যেকটির role আলাদাভাবে বুঝতে হবে। কোনো একটি reference দেখে অন্যগুলো ignore করা যাবে না।

2.1 Master Document — Product Logic Source of Truth

এই document define করবে:

- Creator journey এবং business logic
- Phase prerequisites, skip, resume এবং lock behavior
- Empty, in-progress, completed এবং history states
- কোন output কোন workspace-এ যাবে
- Dynamic data এবং persistence rules
- MVP scope এবং allowed offer types
- Platform-visible English content rules

Figma বা image-এ কোনো temporary sample data থাকলে সেটি business requirement হিসেবে ধরা যাবে না। Product logic-এর ক্ষেত্রে এই master document এবং user-এর latest direct instruction follow করতে হবে।

2.2 Figma Dev Mode — Primary Visual Implementation Source

নিচের Figma Dev Mode nodes থেকে Antigravity-কে actual implementation details নিতে হবে। Screenshot দেখে approximate করা যাবে না যখন Dev Mode থেকে exact value পাওয়া যায়।

Figma Node	Dev Mode Reference
Node 23357:34670	Open Figma Dev Mode — 23357:34670
Node 23357:33772	Open Figma Dev Mode — 23357:33772
Node 23357:35145	Open Figma Dev Mode — 23357:35145
Node 23357:33015	Open Figma Dev Mode — 23357:33015
Node 23357:36123	Open Figma Dev Mode — 23357:36123
Node 23357:35800	Open Figma Dev Mode — 23357:35800
Node 23357:33717	Open Figma Dev Mode — 23357:33717

Figma থেকে যা যা নিতে হবে

প্রতিটি node Dev Mode-এ খুলে Antigravity collect এবং implement করবে:

- Frame এবং container dimensions
- Grid, column এবং alignment behavior
- Auto Layout direction, gap এবং padding
- Exact typography family, weight, size, line-height এবং letter spacing

- Color styles, opacity এবং gradient
- Border width/color, radius এবং shadow
- Component structure এবং reusable variants
- Icon, illustration, logo এবং image assets
- Button, input, card, tab, chip, progress এবং modal states
- Responsive constraints এবং resizing rules
- Visible English UI copy
- Prototype interaction বা navigation clues

Figma assets available থাকলে random replacement icon/image ব্যবহার করা যাবে না। Repeated values codebase-এর design tokens বা reusable components-এ convert করতে হবে; একই value বিভিন্ন জায়গায় uncontrolled hardcode করা যাবে না।

2.3 img-referance folder — Visual Sequence & Acceptance Reference

Img-referance folder ব্যবহার হবে:

- Dashboard এবং Phase 2–6 screen sequence confirm করতে
- Overall visual composition এবং intended user journey বুঝতে
- Figma node-এর সাথে expected screen মিলাতে
- Implementation screenshot side-by-side compare করতে
- Missing element, wrong state বা wrong order detect করতে

Image reference শুধু inspiration নয়; এটি mandatory visual QA reference। তবে exact spacing, typography, dimensions এবং asset details নেওয়ার primary source হলো Figma Dev Mode।

2.4 Existing HTML Prototype — Workspace, Logic Discovery & History Base

Existing Creator Dashboard HTML/codebase ব্যবহার হবে:

- Existing route এবং navigation inventory
- Sidebar shell
- Header এবং reusable layout
- My Idea
- Project Studio
- AI Masterplan
- Offer & Pricing
- The Crossroads
- Marketplace
- Hire Providers
- IP Vault
- Messenger
- Notifications
- Asset Library
- Documents
- Settings

Existing useful page delete করা যাবে না। এগুলো onboarding completion-এর পরে generated data, latest approved output, editable workspace এবং version history দেখাবে। তবে HTML-এর styling যদি supplied Figma-এর সাথে conflict করে, visual implementation Figma অনুযায়ী update করতে হবে।

2.5 Dashboard Exception

Existing HTML-এর current Dashboard Overview final design হিসেবে ব্যবহার করা যাবে না। Dashboard Overview supplied Figma Dev Mode design থেকে implement করতে হবে এবং corresponding Creator Dashboard Overview.png image-এর সাথে side-by-side verify করতে হবে।

2.6 Final Source Priority & Conflict Resolution

কোনো conflict হলে category অনুযায়ী decision নিতে হবে:

Product behavior বা business logic conflict

8. User-এর latest direct instruction
9. এই Master Source of Truth document
10. Existing working behavior, যদি উপরের দুইটির সাথে conflict না করে

Visual design conflict

11. Figma Dev Mode exact properties এবং assets
12. Image reference-এর composition, sequence এবং intended state
13. Existing HTML styling

Content conflict

14. এই document-এর approved English platform copy এবং latest user instruction
15. Figma-এর English text, যদি এটি approved product logic-এর সাথে compatible হয়
16. Existing HTML sample content

Existing HTML-এর AutoInvoice বা অন্য sample completed data product requirement নয়। New Creator-এর জন্য fake completed data দেখানো যাবে না।

Figma এবং image reference-এর মধ্যে visible mismatch থাকলে Antigravity silently guess বা arbitrary mix করবে না। Mismatch report তৈরি করে নিচের তথ্য দেবে:

- Figma node ID
- Related image filename
- Mismatch category
- Figma-তে কী আছে
- Image-এ কী আছে
- Recommended resolution
- কোন source final implementation-এ follow করা হয়েছে এবং কেন

2.7 Mandatory Figma → Image → Implementation Verification

কোনো screen complete declare করার আগে তিনটি জিনিস compare করতে হবে:

17. Figma Dev Mode node
18. Related img-reference picture

19. Running implementation-এর fresh screenshot

প্রতিটি screen-এর verification checklist:

- Correct route এবং screen purpose
- Correct content hierarchy
- Correct components এবং assets
- Correct spacing, dimensions এবং alignment
- Correct typography এবং colors
- Correct active/disabled/loading/completed state
- Correct responsive behavior
- Correct English platform content
- No fake data
- No missing interaction

Final result তখনই দেওয়া যাবে যখন mismatchগুলো correct করা হয়েছে এবং verification matrix-এ screen PASS হয়েছে। শুধু “design completed” বলা acceptable নয়। Antigravity final delivery-তে evidence-based comparison summary দেবে।

3. Product Architecture — Two Connected Layers

System দুইটি connected layer-এ কাজ করবে। এই distinction implementation-এর foundation।

Layer A — Guided Creator Setup

এটি focused onboarding/setup environment। Creator Phase 1 থেকে Phase 6 পর্যন্ত step-by-step এগোবে।

Characteristics:

- Minimal distraction
- Clear progress
- Back, Continue, Save Draft এবং Resume
- Exact current step persistence
- Refresh-এর পরে progress হারাবে না
- Logout/login-এর পরে same step থেকে resume
- Each step input validate হবে
- AI generation/loading state থাকবে
- Completion summary থাকবে

Layer B — Dashboard Workspace & History

এটি sidebar-based workspace। Creator এখানে completed কাজ, generated documents, project history, matching activity এবং future actions দেখবে।

Main purpose:

- Latest approved result show করা
- Previous versions দেখানো
- Edit/regenerate করা
- Download/export করা
- Phase progress দেখা

- Incomplete work resume করা
- Locked future workspace-এর prerequisite বুঝানো

Shared-State Principle

Guided flow এবং dashboard আলাদা data store ব্যবহার করতে পারবে না। একই creatorJourney, project, outputs, assets, documents এবং activityHistory state/API ব্যবহার করবে।

Example:

- Phase 2-তে Project Name save করলে Dashboard এবং My Idea-তে সঙ্গে সঙ্গে update হবে।
- Phase 3-তে Business Plan complete হলে AI Masterplan, Documents এবং Asset Library-তে automatically appear করবে।
- Phase 5-তে branch select করলে Crossroads, Marketplace/Investor Matching এবং dashboard next action update হবে।

4. Creator Journey Overview

Internal implementation Phase 1–6 follow করবে। User interface-এ প্রয়োজন অনুযায়ী phase label দেখানো যাবে, কিন্তু heavy technical numbering দিয়ে experience complicated করা যাবে না।

Phase	Internal Name	Main Outcome
Phase 1	Universal Gate	Verified Creator account এবং dashboard access
Phase 2	Project Identity	Clear idea, project identity এবং brand direction
Phase 3	Project Intelligence	Forecast, business plan, legal এবং capability plan
Phase 4	Offer & Resource Setup	Pricing, launch budget, team/resources এবং GTM
Phase 5	Strategic Crossroads	Full Buyout path অথবা Build/Equity path
Phase 6	Smart Matching	Correct buyer, co-founder অথবা investor matching

5. Phase 1 — Universal Gate

Phase 1 signup-এর পরে mandatory। Required verification complete না হলে Creator main dashboard access করতে পারবে না।

5.1 Mandatory Verification

Minimum requirements:

- Creator role selected
- Email verified
- Phone verified
- Identity document submitted and verified
- Face/liveness verification completed
- Required consent and terms accepted

Backend provider বা verification partner integration later হতে পারে, কিন্তু front-end state এবং guard এখন থেকেই correct হতে হবে।

5.2 Phase 1 Completion Actions

Verification complete হলে Creator দুইটি action পাবে:

Primary Action

Continue Setup

Phase 2 Project Identity শুরু করবে।

Secondary Action

Explore Dashboard for Now

Creator Phase 2 temporary skip করে dashboard overview দেখতে পারবে।

5.3 Temporary Skip Rule

Phase 2 skip করা মানে complete করা নয়। Status হবে:

- available, অথবা
- skipped_for_now

Status কখনো completed হবে না যতক্ষণ Phase 2-এর required steps complete না হয়।

Dashboard-এর Continue Setup button exact next incomplete step open করবে।

5.4 Verification Guard

Unverified Creator protected dashboard route open করলে:

Title: Complete Your Verification

Message: Verify your identity to unlock your Creator dashboard and start building your project.

Primary CTA: Continue Verification

Fake dashboard data দেখানো যাবে না।

6. Shared Journey State Engine

Antigravity প্রথম major implementation হিসেবে centralized state engine তৈরি করবে। Page-specific hard-coded logic ব্যবহার করা যাবে না।

6.1 Required Phase Status

প্রতিটি phase-এর status:

- locked
- available
- skipped_for_now
- not_started
- in_progress
- completed

প্রতিটি phase-এর জন্য:

- currentStep
- completedSteps[]
- startedAt
- lastSavedAt
- completedAt
- version

থাকবে।

6.2 Central Next-Action Resolver

একটি centralized helper/service থাকতে হবে:

```
getNextCreatorAction(journeyState)
```

এটি return করবে:

- target phase
- exact target step
- route
- button label
- prerequisite reason

Continue Setup, Resume Work, dashboard checklist, locked page CTA এবং completion screen একই resolver ব্যবহার করবে।

6.3 Suggested State Structure

```
creatorJourney
  phase1
    status
    currentStep
    completedSteps[]
    completedAt
  phase2
    status
    selectedEntryPath
    currentStep
    completedSteps[]
    lastSavedAt
  phase3
```

```

6.4 Prototype Persistence

Current prototype যদি backend-connected না হয়, প্রথম implementation localStorage ব্যবহার করতে পারে। কিন্তু architecture এমন হতে হবে যেন later API/database adapter দিয়ে replace করা যায়।

Hard-coded global variables-এ core state রাখা যাবে না।

7. Global Page State System

প্রতিটি workspace page চারটি core state support করবে:

20. locked
21. available_not_started
22. in_progress
23. completed

Optional fifth state:

24. empty_completed — Phase complete, কিন্তু এই workspace-এর কোনো asset/activity এখনও তৈরি হয়নি।

7.1 Locked State Rules

Locked state-এ:

- Dashboard shell এবং sidebar visible থাকবে
- Page title visible থাকবে
- Missing prerequisite explain করবে
- One clear primary CTA থাকবে
- Sample result hide থাকবে
- Irrelevant action disable থাকবে

Example:

Title: Project Intelligence Is Locked

Message: Complete your Project Identity before generating a financial forecast and business plan.

CTA: Resume Project Identity

7.2 Available Not Started

Prerequisite complete কিন্তু module start হয়নি।

Message: Your Project Identity is ready. Start Project Intelligence to generate your forecast, business plan, and compliance plan.

CTA: Start Project Intelligence

7.3 In Progress

Show:

- Current step
- Progress percentage
- Last saved timestamp
- Partial output preview only when real data exists

- Resume Work

7.4 Completed

Show:

- Latest approved version
- Created/updated date
- Export/download actions
- Edit/regenerate action
- Version history
- Related next action

8. New Creator Dashboard Overview

Existing HTML Dashboard Overview remove/replace করতে হবে। New overview **Creator Dashboard Overview.png** design hierarchy follow করবে।

8.1 Required Layout Regions

Dashboard-এ থাকবে:

25. Welcome/project progress hero
26. Status chips
27. **Continue Setup** primary CTA
28. Optional public profile preview CTA
29. Progress/score ring
30. Summary metric cards
31. **Get Market Ready Checklist**
32. **Up Next** card
33. Latest Updates
34. Current project snapshot
35. Deal/next-path readiness area

8.2 Important Dynamic Rule

Reference image completed project দেখায়। New user-এর state অনুযায়ী content বদলাবে। Fake views, score, buyers, valuation বা business plan progress দেখানো যাবে না।

8.3 Dashboard State A — Phase 1 Complete, Phase 2 Not Started

Show:

- Identity Verified
- Project Draft Not Started
- Business Plan Locked
- **Continue Setup**
- Checklist item 1 completed
- Checklist item 2 active
- My Idea empty state
- Metrics as zero or helpful onboarding metrics, not fake market activity

Recommended English hero copy:

Title: Welcome to Your Creator Dashboard

Body: Your identity is verified. Continue your setup to turn an idea into a structured, market-ready project.

Continue Setup → Phase 2 start screen.

8.4 Dashboard State B — Phase 2 In Progress

Show:

- Project Draft In Progress

- Current saved project title or **Untitled Project**
- Exact current step
- Last saved time
- **Resume Work**
- Only saved partial data

8.5 Dashboard State C — Phase 2 Complete

Show:

- Identity Verified
- Project Draft Ready
- Business Plan Not Started
- Project name, tagline, category, clarity score এবং brand preview
- **Continue Setup** → Phase 3

8.6 Dashboard State D — Phase 3 Complete

Show:

- Financial Forecast Ready
- Business Plan Ready
- Compliance status
- Skill-gap/action plan
- Generated assets count
- **Continue Setup** → Phase 4

8.7 Dashboard State E — Phase 4 Complete

Show:

- Pricing Ready
- Launch Budget
- Estimated Time to Launch
- Resource Plan
- GTM Plan
- **Continue Setup** → Crossroads

8.8 Dashboard State F — Phase 5/6 Branch

Selected path অনুযায়ী show হবে।

Full Buyout Path

- IP valuation status
- Listing status
- Qualified buyer matches
- Active negotiation

Build / Co-Founder / Equity Path

- Company formation status

- Funding ask
- Co-founder/investor match readiness
- Investor matching activity

Unselected future option-এর activity দেখানো যাবে না।

8.9 MVP Deal Scope

Current MVP-তে active Creator offer types:

36. Full Buyout
37. Co-Founder / Equity

Image reference-এ Licensing এবং Royalty থাকলে visual fidelity-এর জন্য disabled Coming Soon state হিসেবে রাখা যেতে পারে। এগুলো active transaction flow হিসেবে build করা যাবে না, যতক্ষণ future scope instruction দেওয়া না হয়।

9. Existing Sidebar & Route Preservation

Existing HTML-এর routes preserve করতে হবে:

Existing Route	Final Role
Dashboard	Dynamic creator overview এবং next action
My Idea	Idea workspace, drafts, completed identity এবং history
Project Studio	Entire journey timeline এবং phase management
AI Masterplan	Forecast, business plan, compliance এবং skill-gap results
Offer & Pricing	Pricing, packages, resources এবং GTM
The Crossroads	Strategic path selection এবং branch status
Marketplace	Full Buyout listing এবং buyer activity
Hire Providers	Recommended verified providers এবং work initiation
IP Vault	Ownership, valuation, NDA এবং IP documents
Messenger	AI, provider, buyer, co-founder, investor conversations
Notifications	Real system/activity events
Asset Library	Generated visual/business assets
Documents	Business, legal, financial এবং transaction documents
Settings	Account, privacy, security এবং preferences

New Workspace

Build/Equity branch-এর জন্য Investor Matching বা Matching workspace add/connect করতে হবে। এটি Marketplace-এর replacement নয়।

10. Phase 2 — Project Identity

Phase 2 Creator-এর idea formation এবং project identity তৈরি করবে। img-referance folder Phase 2 screens visual এবং sequence reference।

10.1 Phase 2 Entry Screen

Reference:

- phase 2 -project identity.jpg
- phase 2 -project identity-1.jpg
- phase 2 -project identity-2.jpg

Main question:

‘How would you like to start?’

Two clear paths:

Path A — Creator Already Has an Idea

Card title: I Already Have an Idea

Description: Describe your idea and refine it with the Mondial AI Smart Guide.

CTA: Refine My Idea

Path B — Creator Needs Idea Discovery

Card title: Help Me Discover an Idea

Description: Tell us about your interests, skills, and the problems you care about. AI will generate tailored idea options.

CTA: Start Smart Discovery

Both paths eventually merge at Idea Review.

10.2 Path A — AI Idea Refinement Conversation

Creator free-text বা chat format-এ idea explain করবে। Mondial AI Smart Guide structured follow-up questions করবে।

AI must capture:

- Concept
- Target user
- Core problem
- Current alternatives
- Proposed solution
- Market gap
- Creator’s personal edge
- Expected impact
- Preferred business model, when known

AI Interaction Rules

- One focused question at a time
- Creator can skip non-critical question
- Save & Exit available
- AI periodically summarizes understanding
- Creator must approve final structured draft
- AI cannot silently change user's core idea

Recommended English copy:

Title: Let's Shape Your Idea Together

Subtitle: Share what you are thinking. The AI Smart Guide will turn it into a clear project draft.

10.3 Path B — Smart Idea Discovery

Reference:

- phase 2 -project identity-1.jpg
- phase 2 -genarating ideas.jpg
- phase 2 - Idea Cards.jpg

Creator সম্পর্কে collect করতে হবে:

Interests

- Preferred sectors
- Problems or communities they care about
- Technology/business themes

Skills

- Professional skills
- Personal strengths
- Industry experience
- Available time

Preferences

- Digital or physical project
- Local, European or global market
- Solo project or collaboration
- Revenue or impact priority
- Budget range

AI Generation State

Reference loading screen follow করবে।

Recommended copy:

Title: Creating Ideas Around Your Strengths

Body: We are combining your interests, skills, and market opportunities to generate tailored project ideas.

Idea Cards

Each card should show:

- Idea title
- One-line concept
- Target user
- Problem
- Suggested solution
- Category
- Difficulty/effort
- Market potential
- Why it fits the Creator

Actions:

- Select This Idea
- View Details
- Generate More Ideas
- Edit My Preferences
- Describe My Own Idea

10.4 Idea Selected

Reference:

- phase 2 - Idea selected.jpg

Show selected idea with:

- Title
- Concept
- Fit explanation
- Preliminary score
- Key assumptions
- Suggested next questions

Actions:

- Continue with This Idea
- Choose Another Idea
- Edit This Idea

10.5 Idea Summary & First Draft

Reference:

- phase 2 - Idea summary or review.jpg

Required canvas:

- Concept
- Target User
- Core Problem
- Your Solution
- Market Gap
- Your Edge

AI metrics may include:

- Idea Clarity
- Market Potential
- Feasibility
- Founder/Creator Fit

Metrics must be based on real entered data or clearly labelled as AI estimate.

Actions:

- Edit Answers
- Ask AI to Improve
- Continue to Project Name

10.6 Project Finalization & Naming

Reference:

- phase 2 - Idea finalization.jpg

Collect/confirm:

- Project name
- AI name suggestions
- Tagline
- Category
- Target audience
- Core value proposition
- Project preview

Rules:

- Name can be changed later
- Suggested names must be editable
- Name selection creates new project identity version
- Existing name collision check can be a future API, but UI state should exist

Recommended copy:

Title: Name Your Project

Subtitle: Choose a name that makes your idea easy to remember and understand.

10.7 Logo & Brand Direction

References:

- phase 2 - logo and branding.jpg
- phase 2 - Ai logo preview.jpg

Creator দুইটি option পাবে:

Option A — AI Brand Generator

Title: Generate with AI

AI creates:

- Logo concepts
- Color palette

- Typography direction
- Basic visual style

Creator can:

- Select a concept
- Regenerate
- Change style keywords
- Save alternatives

Option B — Hire a Verified Designer**Title:** Work with a Verified Designer

Show suitable Service Providers and allow starting a conversation/project request.

Important: Phase completion-এর জন্য final paid designer delivery mandatory নয়। Creator brand direction save করে continue করতে পারবে।

10.8 Project Identity Complete**Reference:**

- phase 2 - project identity complete!.jpg

Completion summary:

- Project name
- Concept
- Category
- Clarity/validation score
- Selected brand direction
- Completed checklist

Actions:

- View Dashboard
- Continue to Project Intelligence

Completion automatically updates:

- Dashboard
- My Idea
- Project Studio
- Asset Library
- Activity History

11. My Idea Workspace Logic

Existing My Idea HTML layout completed/history view হিসেবে reuse করা হবে। AutoInvoice sample permanently hard-code করা যাবে না।

11.1 No Project Yet**Show:****Title:** Start Your First Project

Message: You have not created a project idea yet. Start with your own idea or let the AI Smart Guide help you discover one.

CTAs:

- I Already Have an Idea
- Help Me Discover an Idea

11.2 Phase 2 In Progress

Show:

- Draft project title or [Untitled Project](#)
- Selected entry path
- Saved summary
- Current step
- Last saved timestamp
- Progress percentage

Actions:

- [Resume Project Identity](#)
- [Review Saved Draft](#)
- [Restart with a Different Path](#)

Restart requires confirmation and must archive current draft instead of deleting silently.

11.3 Phase 2 Complete

Show:

- Latest idea summary
- Project identity
- Clarity score
- Brand kit/direction
- AI notes
- Idea Journal
- Version History

Actions:

- [Edit Project Identity](#)
- [Create New Version](#)
- [Download Summary](#)
- [Continue to Project Intelligence](#)

12. Project Studio Logic

Project Studio হলো Creator journey command center। এটি phase cards/timeline দেখাবে।

Each phase card shows:

- Status
- Completion percentage
- Current step
- Last activity

- Main output
- Start/Resume/View action

Behavior:

- Completed phase → View Results
- In progress → Resume
- Available → Start
- Locked → prerequisite explanation

Project Studio থেকে exact phase step route করতে হবে।

13. Phase 3 — Project Intelligence

Phase 3 Creator-এর project-কে structured, operational এবং decision-ready করবে।

References:

- Phase 3 - project intelligent dashboard.jpg
- Phase 3 - Phase 3.1 — Financial Forecast Results.jpg
- Phase 3 - Phase 3.2 — AI Business Plan generator.jpg
- Phase 3.3 — Creation Assistance.jpg
- Phase 3.4 — Formation Generator.jpg

13.1 Project Intelligence Overview/Input

Reference Project Intelligence dashboard অনুযায়ী collect:

- Revenue model
- Price/average transaction
- Monthly expected customers or sales
- Fixed costs
- Variable costs
- Initial launch investment
- Growth assumption
- Market size/context

AI assumptions clearly visible এবং editable হবে।

CTA:

- Create My Financial Forecast

13.2 Financial Forecast

Outputs:

- 3-year revenue forecast
- Cost vs revenue
- Break-even month
- Cashflow
- Profit/loss view
- Monthly ledger
- Initial investment requirement
- CAC estimate
- LTV estimate
- Runway estimate
- Confidence level

Actions:

- Edit Assumptions
- Recalculate
- Download Report
- Continue to Business Plan

Every recalculation creates a new version.

13.3 AI Business Plan

Generate section-by-section:

38. Executive Summary
39. Project/Company Overview
40. Market Analysis
41. Competitive Landscape
42. Product & Service
43. Marketing & Sales Strategy
44. Operations
45. Financial Projections
46. Funding & Resource Needs

Required behavior:

- Generation progress shown
- Each section editable
- AI sources/assumptions labelled where relevant
- Export PDF and DOCX interface
- Regenerate one section without replacing entire plan
- Approved version saved

13.4 Compliance & Creation Assistance

Reference Compliance Studio follow করবে।

Show:

- Recommended legal structure
- IP protection checklist
- Terms & Conditions requirement
- Privacy/GDPR requirement
- Business bank/accounting steps
- Professional liability/insurance needs
- Verified legal/accounting providers

Do not present AI guidance as formal legal advice. Platform copy:

AI-generated guidance. Final legal or financial decisions should be reviewed by a qualified professional.

13.5 Skill Gap / Formation Generator

Reference:

- Phase 3.4 — Formation Generator.jpg

Creator selects existing skills এবং system identifies missing capability.

Show:

- Skills already covered
- Missing roles/skills
- Priority level
- Hire a Service Provider
- Find a Co-Founder

- Training recommendation

For MVP, co-founder flow can connect to Co-Founder / Equity path or matching preparation. Provider recommendations connect to Hire Providers.

13.6 Phase 3 Completion Outputs

Automatically populate:

- AI Masterplan
- Documents
- Asset Library
- Hire Providers
- Project Studio
- Dashboard checklist

14. AI Masterplan Workspace Logic

Phase 2 Incomplete

Title: Complete Your Project Identity First

Message: Define your project before generating a financial forecast, business plan, and compliance plan.

CTA: Resume Project Identity

Phase 2 Complete, Phase 3 Not Started

Title: Build Your Project Intelligence

Message: Generate the financial, strategic, legal, and capability plans needed to move forward with confidence.

CTA: Start Project Intelligence

Phase 3 In Progress

Show module progress এবং exact resume CTA.

Phase 3 Complete

Existing AI Masterplan layout ব্যবহার করে show:

- Financial Forecast
- Business Plan
- Compliance Plan
- Skill Gap Plan
- Downloads
- Version History
- Next phase CTA

15. Phase 4 — Offer & Resource Setup

References:

- Phase 4- Step 4.1 Services & Pricing.jpg
- Phase 4- 4.2 AI Resource Calculator.jpg
- Phase 4- 4.3 GTM Setup.jpg
- Phase 4- 4.4 Offer & Resource Setup Complete.jpg

15.1 Pricing & Offer Definition

Creator chooses relevant pricing model:

- Subscription
- One-Time
- Freemium
- Usage-Based
- Custom/Other when applicable

For product/service projects, package builder may show Basic, Standard and Premium tiers. Package fields:

- Name
- Price
- Included features
- Limits
- Delivery/access model
- Recommended tier

AI pricing insight should use project data and clearly label estimates.

15.2 AI Resource Calculator

Calculate:

- Initial launch budget
- Estimated launch timeline
- Required roles
- Required tools
- Legal/compliance cost
- Marketing/GTM cost
- Miscellaneous buffer

Show verified provider recommendations with:

- Role
- Rating/tier
- Estimated price
- Match reason
- View Profile
- Start Conversation

15.3 Web & GTM Setup

Show launch checklist:

- Domain
- Professional email
- Landing page
- Social profiles
- Waitlist/lead capture
- Launch channels
- Weekly GTM plan

Creator can mark external tasks complete or start provider work.

15.4 Phase 4 Complete

Completion page shows:

- Brand Identity
- Forecast
- Business Plan
- Legal Checklist
- Pricing
- GTM Strategy
- Total launch budget
- Time to launch

Primary CTA:

[Continue to The Crossroads](#)

Outputs populate:

- Offer & Pricing
- Hire Providers
- Asset Library
- Project Studio
- Dashboard

16. Phase 5 — The Strategic Crossroads

Reference:

- Phase 5 -The crossroad.jpg

Crossroads হলো real strategic branch। Selection persist করতে হবে এবং branch-specific pages unlock হবে।

16.1 Path A — Full Buyout

MVP active sell path হলো Full Buyout। Creator idea/IP সম্পূর্ণ transfer করার জন্য prepare করবে।

Image reference-এর Sell/License design follow করা যাবে, কিন্তু active deal type:

- Full Buyout

Optional disabled future types:

- Licensing — Coming Soon
- Royalty — Coming Soon

Path A flow:

47. AI IP Valuation
48. Marketplace Listing
49. Visibility & NDA preferences
50. Buyer matching
51. Conversation/negotiation
52. Transfer preparation

16.2 AI IP Valuation

Reference:

- Phase 5.1 - AI IP Valuation.jpg

Show:

- Estimated valuation range
- Confidence level
- Valuation factors
- Comparable references/benchmarks when available
- Clarity score
- Market size
- Technical feasibility
- Creator credibility

Copy must state estimate:

This is an AI-generated estimate and not a certified valuation.

CTA:

Continue to Listing

16.3 Marketplace Listing

Reference:

- Phase 5.2 - Creator Marketplace Listing.jpg

Listing settings:

- Public Listing
- Matched Only
- Private Invitation

MVP deal preference:

- Full Buyout selected

Security settings:

- NDA required before sensitive details
- Watermarked preview
- Protected document access

Actions:

- Save Draft
- Preview Listing
- Publish Listing

16.4 Buyer Matching

Reference:

- Phase 5.3 - Smart Matchmaking Results.jpg

Show:

- Qualified entrepreneurs/buyers
- Match percentage
- Match reason
- Budget range
- Sector/market fit
- Actions: View Profile, Request NDA, Start Conversation

Matching results must be real API data later; prototype can use explicitly marked demo fixtures only in development mode, never presented as actual user activity.

16.5 Path B — Build / Co-Founder / Equity

MVP active build path:

- Build a company/project
- Find a Co-Founder / Equity partner
- Prepare funding ask
- Unlock investor matching where appropriate

Reference image Build It Yourself card visual intent follow করবে।

16.6 Company Formation Preparation

Reference:

- Phase 5.4 - Company Formation.jpg

Collect/prepare:

- Country/jurisdiction
- Recommended structure
- Founder/equity allocation draft

- Required documents
- Registration checklist
- Legal provider recommendation

Mondial can guide and connect providers. Formal registration execution depends on future partner/API scope.

16.7 Seed Funding Ask

Reference:

- Phase 5.5 - Seed Funding Input.jpg

Collect:

- Total funding needed
- Use of funds
- Product development allocation
- Marketing/GTM allocation
- Operations/legal allocation
- Preferred funding type

For MVP, recommended active funding options can be limited to:

- Equity
- SAFE, if enabled by product decision

Do not expose unsupported funding instruments as active actions.

16.8 Branch Change Rule

Creator can review the other path, কিন্তু selected branch change করলে confirmation প্রয়োজন। Existing progress archive হবে।

Confirmation copy:

Title: Change Your Strategic Path?

Message: Your current progress will be saved, but the dashboard and next actions will switch to the new path.

Actions: Keep Current Path, Change Path

17. Phase 6 — Smart Matching

References:

- Phase 6 - Smart Matchmaking Engine- Investor Matching.jpg
- Investor Matching.jpg

Phase 6 primarily Build/Equity branch-এর জন্য। Full Buyout path buyer matching Phase 5-এর মধ্যে continue করবে।

17.1 Matching Inputs

Use:

- Sector
- Stage
- Geography
- Funding ask
- Ticket size
- Business model
- Traction/readiness
- Founder/co-founder needs
- Investment preference

17.2 Matching Results

Show:

- Featured best match
- Qualified match list
- Match percentage
- Sector fit
- Stage fit
- Geography fit
- Ticket fit
- Investment thesis preview
- Portfolio/activity snapshot where allowed

Actions:

- View Profile
- View Investment Thesis
- Send Pitch
- Start Conversation

17.3 Investor Matching Workspace

Add/connect dedicated workspace with:

- Match list
- Saved matches
- Pitch status
- Conversation status
- Data room readiness

- Deal pipeline readiness

It must connect to Messenger, Documents এবং notifications.

18. Route-to-Phase Access Matrix

Workspace	Minimum Requirement	Not Ready Behavior	Primary CTA
Dashboard	Phase 1 completed	Verification guard	Continue Verification
My Idea	Phase 1 completed	Start/Resume Phase 2	Start Project Identity
Project Studio	Phase 1 completed	Always shows journey status	Continue Setup
AI Masterplan	Phase 2 completed	Locked/Start/Resume state	Resume Project Identity or Start Project Intelligence
Offer & Pricing	Phase 3 completed	Locked/Start/Resume state	Start Offer & Resource Setup
The Crossroads	Phase 4 completed	Locked state	Complete Offer & Resource Setup
Marketplace	Full Buyout path selected	Branch prerequisite	Prepare My Listing
IP Vault	Full Buyout/IP process started	Empty/start state	Start IP Valuation
Investor Matching	Build/Equity path and funding readiness	Locked/start state	Complete Funding Ask
Hire Providers	Skill/resource needs available	Helpful empty state	Analyze My Resource Needs
Asset Library	Phase 2 or generated asset exists	Empty state	Create My First Asset
Documents	Phase 1 complete	Show verification docs only	Contextual action
Messenger	Phase 1 complete	Empty until real conversation	Explore Matches or Talk to AI Guide
Notifications	Phase 1 complete	Empty state	No forced CTA

19. Cross-Page Data Propagation

Phase completion-এর output কোথায় যাবে তা centralized mapping দিয়ে implement করতে হবে।

Source Step	Destination Workspaces
Phase 2 Idea Draft	Dashboard, My Idea, Project Studio
Phase 2 Brand Direction	Dashboard, My Idea, Asset Library
Phase 3 Forecast	AI Masterplan, Documents, Asset Library, Dashboard
Phase 3 Business Plan	AI Masterplan, Documents, Asset Library, Dashboard
Phase 3 Compliance	AI Masterplan, Documents, Hire Providers
Phase 3 Skill Gap	AI Masterplan, Hire Providers, Project Studio
Phase 4 Pricing	Offer & Pricing, Dashboard
Phase 4 Resource Plan	Offer & Pricing, Hire Providers, Dashboard
Phase 4 GTM Plan	Offer & Pricing, Documents, Asset Library
Phase 5 Valuation	IP Vault, Marketplace, Dashboard
Phase 5 Listing	Marketplace, IP Vault, Dashboard

Source Step	Destination Workspaces
Phase 5 Company Formation	Documents, Project Studio, Dashboard
Phase 5 Funding Ask	Investor Matching, Documents, Dashboard
Phase 6 Matches	Investor Matching, Messenger, Notifications

No duplicate manual input should be required when data already exists.

20. History & Versioning Rules

History system user-এর second requested path: completed phase-এর output future-এ দেখতে হবে।

20.1 Version Creation

New version তৈরি হবে যখন:

- Creator AI output regenerate করে
- Creator approved data significantly edits করে
- Financial assumptions change করে recalculates
- Business plan section regenerates
- Pricing/resource/valuation changes
- Strategic path changes

20.2 Version Data

Each version stores:

- Version number
- Created date/time
- Created by user/AI/system
- Status: Draft, Approved, Archived
- Source phase/step
- Summary of changes

20.3 Display Rule

- Dashboard latest approved version দেখাবে
- Workspace latest draft বা approved context অনুযায়ী দেখাবে
- User previous version compare/view করতে পারবে
- Regenerate previous approved result silently overwrite করবে না
- Delete action archive করবে, permanent delete default নয়

20.4 Phase Completion History

Each completed phase creates activity record:

- Phase name
- Completion date
- Outputs created
- Next action unlocked

21. Asset Library & Documents

21.1 Asset Library

Only actual generated/saved assets show করবে:

- Logo concepts

- Brand palette
- Project summary
- Pitch visuals
- Forecast charts
- Listing cover

Each asset has:

- Type
- Version
- Created date
- Source phase
- Preview
- Download
- Open source step

21.2 Documents

May contain:

- Identity verification receipt/status
- Project summary
- Financial forecast
- Business plan
- Legal checklist
- Formation checklist
- Funding ask
- NDA
- Full Buyout transfer documents
- Pitch deck

Document state:

- Draft
- Generated
- Awaiting Review
- Approved
- Signed

Do not show documents that have not been generated.

22. Messenger Integration

Messenger existing HTML preserve করবে, কিন্তু conversation context dynamic হবে।

Conversation types:

- Mondial AI Smart Guide
- Service Provider
- Buyer/Entrepreneur
- Co-Founder candidate
- Investor

- Support

22.1 Creator MVP Offer Actions

Active offer types:

- Full Buyout Offer
- Co-Founder / Equity Offer

Unsupported offer actions hide/disable থাকবে।

22.2 Context Actions

Depending on conversation:

- Request NDA
- Accept NDA
- Share protected document
- Send Full Buyout Offer
- Send Co-Founder / Equity Proposal
- Schedule meeting
- Start provider work request
- Send pitch

AI conversation history from Phase 2 can be accessible but must be separated from external negotiations.

23. Notification Logic

Notifications real state change থেকে generate হবে। Example English notifications:

- Your identity verification is complete.
- Your Project Identity draft was saved.
- Your financial forecast is ready.
- A new version of your business plan was created.
- Your marketplace listing is now live.
- You received a new qualified buyer match.
- A verified investor viewed your pitch.
- A service provider replied to your request.

New user-এর জন্য fake interested buyer notification দেখানো যাবে না।

24. English Platform Copy Library

এই section user-facing English copy-এর baseline। Design-এ content English থাকবে।

24.1 Global Buttons

- Continue Setup
- Resume Work
- Save Draft
- Back
- Continue
- Start Now
- View Results
- Edit
- Regenerate
- Download
- View History
- Go to Dashboard

24.2 Common Locked State

Title: This Workspace Is Not Ready Yet

Message: Complete the required setup step to unlock this workspace and its results.

24.3 Common Empty State

Title: Nothing Here Yet

Message: Your completed work and generated assets will appear here.

24.4 Save State

- Saving...
- Draft saved
- Last saved just now
- Your progress is safe. You can continue later.

24.5 AI Generation State

- Analyzing your answers...
- Building your project draft...
- Generating tailored ideas...
- Creating your financial forecast...
- Writing your business plan...
- Finding qualified matches...

24.6 Error State

Title: We Could Not Complete This Action

Message: Your progress has been saved. Please try again.

CTA: Try Again

24.7 No Project

Title: Start Your First Project

Message: Bring your own idea or use the AI Smart Guide to discover one based on your strengths.

24.8 No Match

Title: No Qualified Matches Yet

Message: We are still searching based on your preferences. You can update your criteria or check again later.

25. Design & UX Rules

25.1 Visual Direction

Image reference-এর clean white/light-gray premium SaaS style follow করতে হবে।

Brand palette baseline:

- Primary: #3C61DD
- Secondary: #1F3FAF
- Tertiary: #6F8BFF
- Accent/Neutral: #E8EEFF

Status colors consistent হবে:

- Success: green
- Warning/in progress: amber/orange
- Error: red
- Locked/neutral: gray

25.2 Guided Flow vs Dashboard

- Guided setup: focused layout, minimal sidebar or step-specific module navigation
- Dashboard: full sidebar and header
- Completion screen থেকে dashboard/next phase দুইটি clear action

25.3 Responsive Behavior

Support:

- Desktop
- Tablet
- Mobile

Mobile-এ:

- Sidebar collapses
- Cards stack
- Sticky bottom primary CTA may be used

- Tables horizontal scroll বা card view হয়
- No clipped text/button

25.4 Accessibility

- Keyboard navigation
- Visible focus state
- Form labels
- Proper contrast
- Screen-reader-friendly status
- Loading status announcements
- Error linked to correct field

26. Data Integrity & Security Rules

- Sensitive verification documents public profile-এ show করা যাবে না
- NDA-protected content access logged হবে
- Private listing details unauthorized user দেখতে পারবে না
- UI-only lock security হিসেবে ধরা যাবে না; backend/API guard later required
- User data state separate by authenticated account
- Development fixtures production user data হিসেবে present করা যাবে না

27. Antigravity Implementation Plan

Antigravity সবকিছু একবারে uncontrolledভাবে modify করবে না। নিচের task order follow করবে।

Task 1 — Audit Only

Audit-এর সময় existing code-এর পাশাপাশি supplied সাতটি Figma Dev Mode node এবং পুরো img-referance sequence inspect করতে হবে।

Return:

53. Current routes/pages/components
54. Reusable elements এবং existing design tokens
55. Existing sample/fake data locations
56. Current state/navigation/persistence logic
57. Figma node-to-route/screen mapping
58. Figma node-to-image filename mapping
59. Figma বনাম image-reference mismatch report
60. Required assets, typography এবং component variants
61. Files that must change
62. Risk/conflict/missing-dependency list
63. Proposed implementation screenshot verification method

No code modification. Audit report না দিয়ে implementation শুরু করা যাবে না।

Task 2 — Shared Journey State Engine

Implement:

- Phase status
- Current step
- Exact next-action resolver
- Persistence
- Project/output store
- Migration/default empty state

Task 3 — Dashboard Overview Replacement

- Replace only Dashboard Overview; useful workspace pages preserve করবে
- Dashboard-এর Figma Dev Mode node থেকে exact visual properties/assets নেবে
- Creator Dashboard Overview.png-এর সাথে side-by-side verify করবে
- Bind every component to shared state
- Create State A-F behavior
- Remove fake completed metrics for new users
- Final screenshot comparison PASS না হওয়া পর্যন্ত task complete বলা যাবে না

Task 4 — Phase 1 Exit & Guards

- Mandatory verification guard
- Continue Setup

- Explore Dashboard for Now
- Temporary Phase 2 skip

Task 5 — Complete Phase 2

- Two entry paths
- AI refinement flow
- Smart discovery flow
- Generation state
- Idea cards
- Review
- Naming
- Branding
- Completion

Task 6 — Connect My Idea & Project Studio

- Empty state
- In-progress state
- Completed state
- History/version state
- Exact resume

Task 7 — Complete Phase 3

- Financial input
- Forecast
- Business plan
- Compliance
- Skill gap
- AI Masterplan connection

Task 8 — Complete Phase 4

- Pricing
- Resource calculator
- Provider recommendation
- GTM setup
- Completion

Task 9 — Complete Phase 5

- Crossroads
- Full Buyout branch
- Build/Equity branch
- Branch persistence/change confirmation
- Marketplace/IP Vault connection

Task 10 — Complete Phase 6

- Investor/co-founder matching
- Matching workspace
- Messenger and notification connection

Task 11 — All Workspace States

For every route implement:

- Locked
- Available not started
- In progress
- Completed
- Empty where needed

Task 12 — History, Assets & Documents

- Versioning
- Activity history
- Asset links
- Document state
- Download placeholders/API interface

Task 13 — Responsive & Accessibility QA

- Desktop/tablet/mobile
- Keyboard/focus
- Loading/error states

Task 14 — End-to-End QA

Run all scenarios in Section 29.

28. Coding & Delivery Rules for Antigravity

64. Existing stack preserve করো।
65. Existing useful page remove করো না।
66. Framework migration করো না unless explicitly approved.
67. Reusable component/state helper তৈরি করো।
68. Inline hard-coded journey logic avoid করো।
69. New user default state empty হবে।
70. AutoInvoice sample dev fixture হিসেবে রাখতে হলে clearly isolate করো।
71. Buttons must work.
72. Refresh must preserve progress.
73. Route guard must work by direct URL/navigation.
74. Every task শেষে test report দাও।
75. User-কে document-এ answered question আবার করো না।

- 76. Requirement conflict পেলে exact conflicting sections quote করে clarification চাও।
- 77. Unrelated redesign করো না।
- 78. Implementation complete দাবি করার আগে acceptance criteria verify করো।

29. Required Test Scenarios

Scenario 1 — Brand-New Unverified Creator

Expected:

- Dashboard blocked
- Verification CTA
- No project data

Scenario 2 — Phase 1 Complete, Creator Explores Dashboard

Expected:

- Dashboard opens
- Identity Verified
- Project Not Started
- Continue Setup → Phase 2 start

Scenario 3 — Existing-Idea Path Partially Saved

Expected:

- Refresh preserves conversation/draft
- Dashboard Resume opens exact question/step
- My Idea shows in-progress draft

Scenario 4 — Discovery Path Partially Saved

Expected:

- Preferences preserved
- Generated Idea Cards preserved or safely regenerated
- Exact resume works

Scenario 5 — Phase 2 Complete

Expected:

- Dashboard project snapshot appears
- My Idea completed view appears
- Project Studio Phase 2 complete
- Phase 3 available

Scenario 6 — AI Masterplan Clicked Before Phase 2 Complete

Expected:

- Locked state
- Correct prerequisite
- Resume Phase 2 CTA
- No fake forecast

Scenario 7 — Phase 3 In Progress

Expected:

- Forecast/business plan progress correct
- Partial outputs only where generated
- Exact resume

Scenario 8 — Phase 4 Complete

Expected:

- Pricing, budget, resources and GTM visible
- Crossroads unlocks

Scenario 9 — Full Buyout Path

Expected:

- Valuation → listing → buyer matching
- Marketplace/IP Vault populated
- Investor matching not incorrectly required

Scenario 10 — Build/Equity Path

Expected:

- Formation preparation
- Funding ask
- Investor/co-founder matching unlock
- Marketplace full-buyout activity not shown as selected path

Scenario 11 — Path Change

Expected:

- Confirmation shown
- Previous progress archived
- Dashboard and next action update

Scenario 12 — Version History

Expected:

- Regenerate creates new version
- Previous approved version remains available
- Dashboard uses latest approved version

Scenario 13 — Logout/Login & Refresh

Expected:

- Exact progress persists
- No state reset
- Direct route guards remain correct

Scenario 14 — Mobile

Expected:

- No horizontal layout break except intended tables
- CTA accessible
- Sidebar usable
- Forms readable

30. Acceptance Criteria — Definition of Done

Implementation accepted only when:

- Phase 1 mandatory verification guard works
- Phase 2 temporary skip works after Phase 1
- Dashboard image-reference design replaces current overview
- Dashboard content is dynamic by journey state
- Continue Setup resumes exact next incomplete step
- My Idea offers both existing-idea and AI-discovery paths
- Phase 2 outputs populate dashboard/history
- Phase 3 outputs populate AI Masterplan, Documents and Assets
- Phase 4 outputs populate Offer & Pricing and provider/GTM areas
- Phase 5 correctly separates Full Buyout and Build/Equity paths
- Phase 6 matching only unlocks for correct path/readiness
- Future pages show locked/empty state, never fake completed results
- History/versioning works
- Refresh/logout/login preserve progress
- Existing useful pages remain functional
- All platform visible content is English
- Responsive behavior is usable
- Required test scenarios pass

30.1 Design Fidelity Gate — Mandatory Before Final Delivery

Final product accept করার আগে Antigravity একটি Design Verification Matrix দেবে। Minimum columns:

Route/Screen	Figma Node	Image Reference	Implementation Screenshot	Status	Corrected Differences
Dashboard	23357:xxxxx	Creator Dashboard Overview.png	Fresh screenshot	PASS	Spacing corrected

Required final evidence:

- সব supplied Figma node inspected
- প্রতিটি node correct route/screen-এর সাথে mapped
- Relevant image-reference filename mapped
- Fresh implementation screenshot captured
- Desktop visual comparison completed
- Responsive behavior tested
- Detected mismatch corrected অথবা clearly documented
- All final rows marked PASS

কোনো supplied node Not Checked, কোনো required image Not Mapped, অথবা কোনো critical row FAIL থাকলে final delivery incomplete হিসেবে গণ্য হবে।

31. Image Reference Mapping

Dashboard

- Creator Dashboard Overview.png → New dynamic Dashboard Overview

Phase 2

- phase 2 -project identity.jpg → Entry choice
- phase 2 -project identity-1.jpg → Discovery inputs
- phase 2 -project identity-2.jpg → Entry/idea input variation
- phase 2 -generating ideas.jpg → AI generation/loading
- phase 2 - Idea Cards.jpg → Idea options
- phase 2 - Idea selected.jpg → Selected idea detail
- phase 2 - Idea summary or review.jpg → Structured first draft/review
- phase 2 - Idea finalization.jpg → Project naming/finalization
- phase 2 - logo and branding.jpg → Branding method selection
- phase 2 - Ai logo preview.jpg → AI brand concepts
- phase 2 - project identity complete!.jpg → Phase completion

Phase 3

- Phase 3 - project intelligent dashboard.jpg → Forecast input/overview
- Phase 3 - Phase 3.1 — Financial Forecast Results.jpg → Forecast result
- Phase 3 - Phase 3.2 — AI Business Plan generator.jpg → Business plan
- Phase 3.3 — Creation Assistance.jpg → Compliance/legal setup

- Phase 3.4 — Formation Generator.jpg → Skill gap and action matching

Phase 4

- Phase 4- Step 4.1 Services & Pricing.jpg → Pricing
- Phase 4- 4.2 AI Resource Calculator.jpg → Resource/budget plan
- Phase 4- 4.3 GTM Setup.jpg → Web/GTM checklist
- Phase 4- 4.4 Offer & Resource Setup Complete.jpg → Completion summary

Phase 5

- Phase 5 -The crossroad.jpg → Strategic path
- Phase 5.1 - AI IP Valuation.jpg → IP valuation
- Phase 5.2 - Creator Marketplace Listing.jpg → Listing settings
- Phase 5.3 - Smart Matchmaking Results.jpg → Buyer matching
- Phase 5.4 - Company Formation.jpg → Formation preparation
- Phase 5.5 - Seed Funding Input.jpg → Funding ask

Phase 6

- Phase 6 - Smart Matchmaking Engine- Investor Matching.jpg → Matching setup/results
- Investor Matching.jpg → Investor Matching workspace

32. Master Instruction to Paste into Antigravity

You are implementing the Mondial.eco Creator Experience.

The attached "Mondial Creator Master Source of Truth" document is the complete product and implementation specification. Read it fully before changing code. The user must not need to repeat requirements already defined in the document.

You have four reference groups:

1. This Master Source of Truth document for product logic, states, scope, routes, English UI content rules, and acceptance criteria.
2. Seven supplied Figma Dev Mode links for exact visual implementation details, assets, measurements, typography, colors, spacing, component variants, and responsive constraints.
3. The img-referance folder or screen sequence, composition, intended states, and mandatory visual comparison.
4. The existing Creator Dashboard HTML/codebase for reusable routes, components, workspace pages, completed outputs, and history architecture.

Figma Dev Mode links:

-
<https://www.figma.com/design/5oHxoppTAyS4zb2DfUdYwy/Mondial-Dashboard-Working-after-restored?node-id=23357-34670&m=dev>
 -
<https://www.figma.com/design/5oHxoppTAyS4zb2DfUdYwy/Mondial-Dashboard-Working-after-restored?node-id=23357-33772&m=dev>
 -
<https://www.figma.com/design/5oHxoppTAyS4zb2DfUdYwy/Mondial-Dashboard-Working-after-restored?node-id=23357-35145&m=dev>
 -
<https://www.figma.com/design/5oHxoppTAyS4zb2DfUdYwy/Mondial-Dashboard-Working-after-restored?node-id=23357-33015&m=dev>
 -
<https://www.figma.com/design/5oHxoppTAyS4zb2DfUdYwy/Mondial-Dashboard-Working-after-restored?node-id=23357-36123&m=dev>
 -
<https://www.figma.com/design/5oHxoppTAyS4zb2DfUdYwy/Mondial-Dashboard-Working-after-restored?node-id=23357-35800&m=dev>
 -
<https://www.figma.com/design/5oHxoppTAyS4zb2DfUdYwy/Mondial-Dashboard-Working-after-restored?node-id=23357-33717&m=dev>

Do not approximate a design from screenshots when exact Dev Mode values are available. Inspect every supplied node. Extract and reuse its assets and design properties. Convert repeated properties into the project's reusable design tokens and components.

For every implemented screen, perform this mandatory three-way comparison:

- A. Figma Dev Mode node
- B. Related image inside img-referance
- C. Fresh screenshot of the running implementation

Check layout, hierarchy, dimensions, spacing, typography, colors, assets, component states, English content, interactions, and responsive behavior. If Figma and an image differ, do not silently guess. Record the mismatch, recommend a resolution, and state which source was followed and why.

Source rules:

- Product behavior: latest user instruction, then this master document.
- Exact visual properties and assets: Figma Dev Mode.
- Screen sequence, intended state, and visual acceptance: img-referance.
- Reusable workspace structure: existing HTML/codebase.

Important implementation rules:

- All platform-visible content must be English.

- Preserve the existing stack.
- Do not rebuild from zero.
- Do not delete useful pages.
- Replace the existing Dashboard Overview using Figma and verify it against Creator Dashboard Overview.png.
- Use guided references for Phase 2–6 screens.
- Use existing HTML pages as completed-data and history workspaces.
- Phase 1 verification is mandatory.
- Phase 2 may only be skipped temporarily after Phase 1.
- Continue Setup must resume the exact next incomplete step.
- Never show fake completed data when a prerequisite phase is incomplete.
- Use one shared journey/project/output state across onboarding and dashboard.
- Current MVP Creator offer types are Full Buyout and Co-Founder / Equity. Licensing and Royalty may only appear as disabled Coming Soon items unless later approved.

Begin with Task 1: Audit Only. Do not modify code yet.

Return:

1. Current route/page/component inventory.
2. Reusable parts and current design tokens.
3. What must be replaced.
4. Existing sample-data locations.
5. Figma node-to-route mapping.
6. Figma node-to-image mapping.
7. Figma-versus-image mismatch report.
8. Proposed shared state architecture.
9. Exact files you will change in Task 2.
10. Risks, conflicts, missing assets, fonts, or dependencies.
11. The final screenshot verification method you will use.

Stop after the audit and wait for approval.

At the end of the full implementation, do not provide only a verbal completion message. Provide a final Design Verification Matrix containing each route/screen, its Figma node, related image filename, implementation screenshot, detected differences, corrections, and PASS/FAIL status. The final result is acceptable only when all required screens pass.

33. Final Product Principle

Creator যেন কখনো confused না হয়:

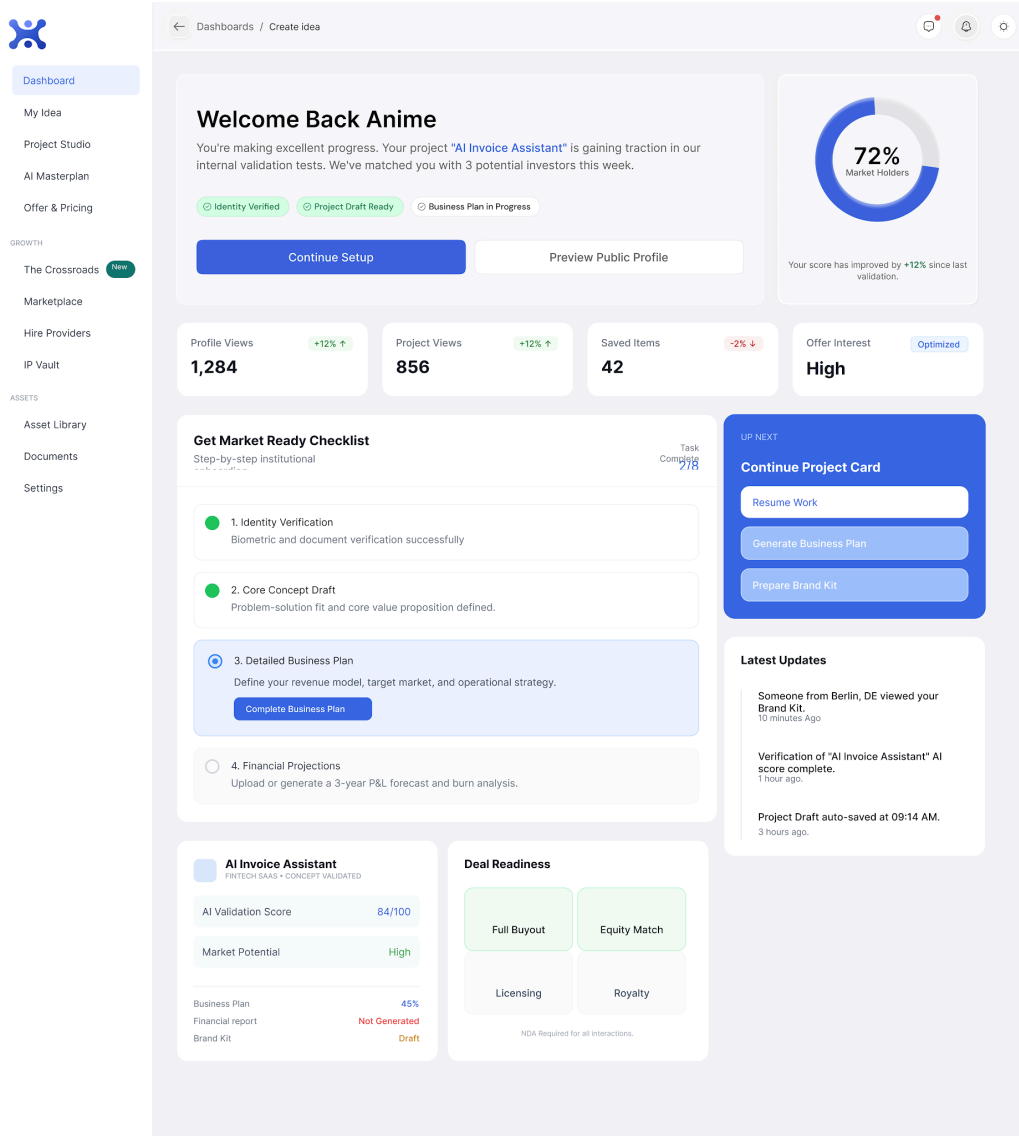

- আমি এখন কোথায়?
- আমি কী complete করেছি?
- পরের কাজ কী?
- আমার generated result কোথায়?
- কোনো page locked কেন?
- আমি কীভাবে resume করব?

প্রতিটি screen এই questions-এর clear answer দেবে। Guided setup Creator-কে কাজ complete कराবে, আর Dashboard Workspace সেই কাজের permanent, editable এবং versioned history দেখাবে। এটাই Mondial.eco Creator Experience-এর core system।

Visual Reference Appendix

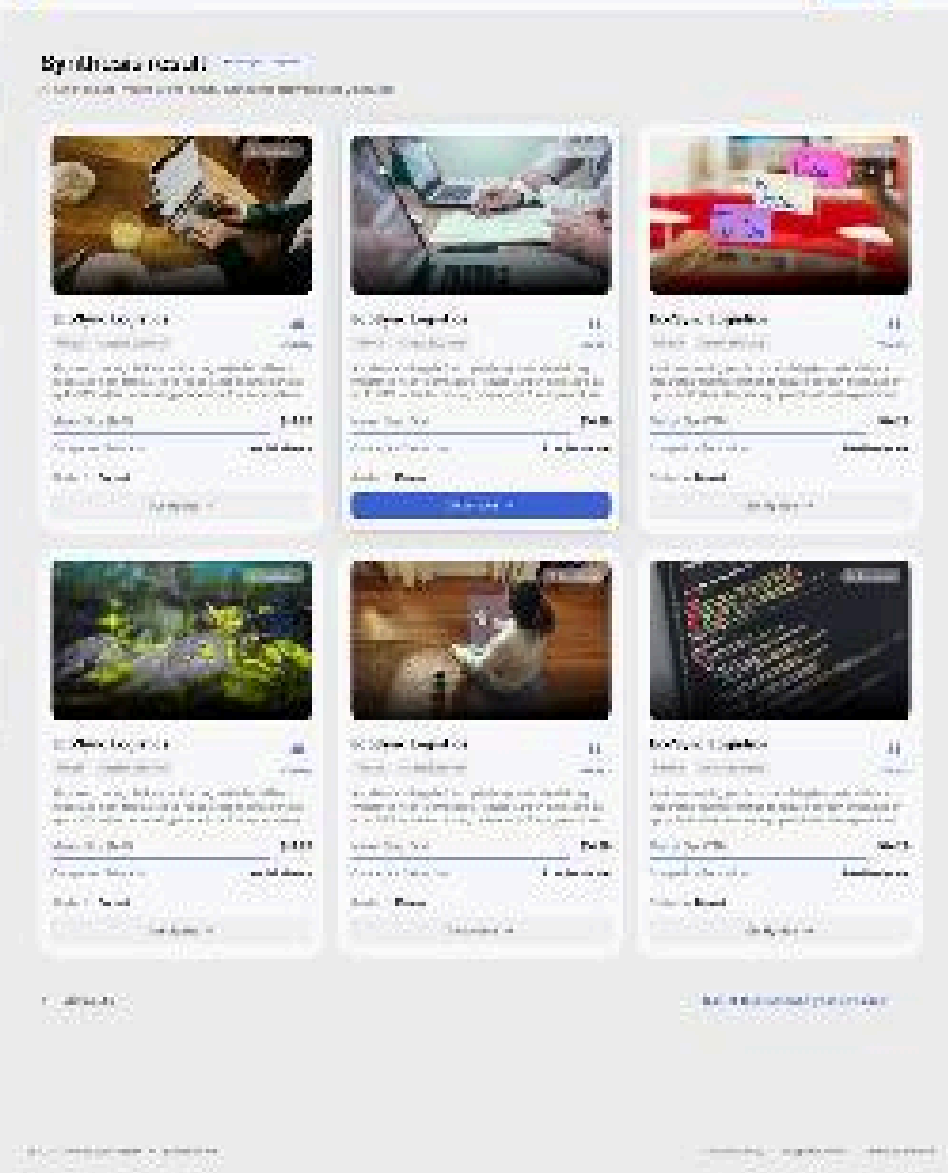

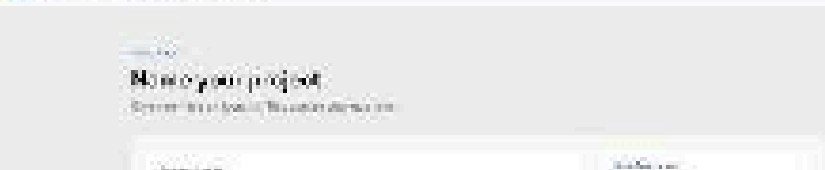

এই appendix img-referance folder -এর screen groups visually map করে। Implementation-এর exact design properties Figma Dev Mode থেকে নিতে হবে, তারপর original folder images এবং running implementation screenshot-এর সাথে side-by-side verify করতে হবে।

Phase 2 Visual Sequence

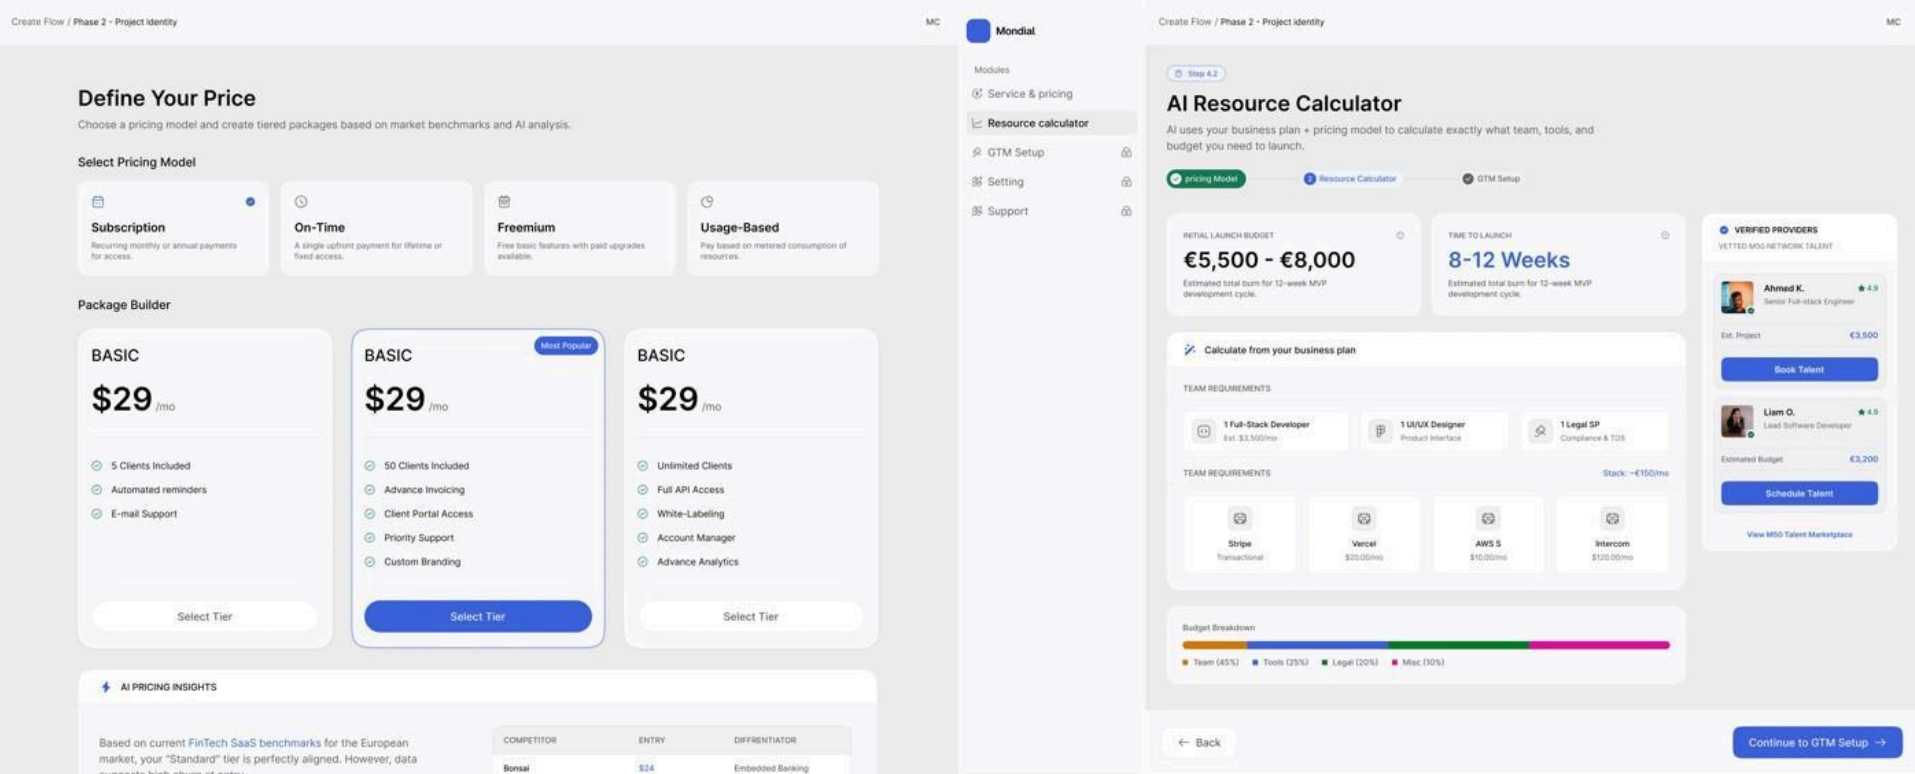

Compressed visual index. Use the original folder image files for detailed implementation.

Phase 3 Visual Sequence

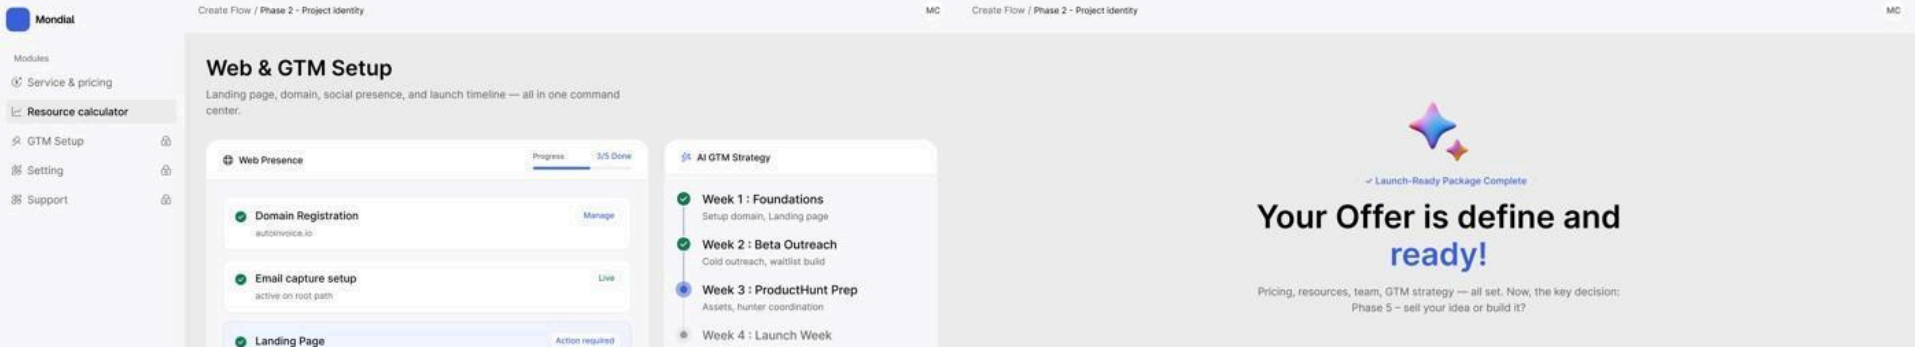

Compressed visual index. Use the original folder image files for detailed implementation.

Phase 4 Visual Sequence

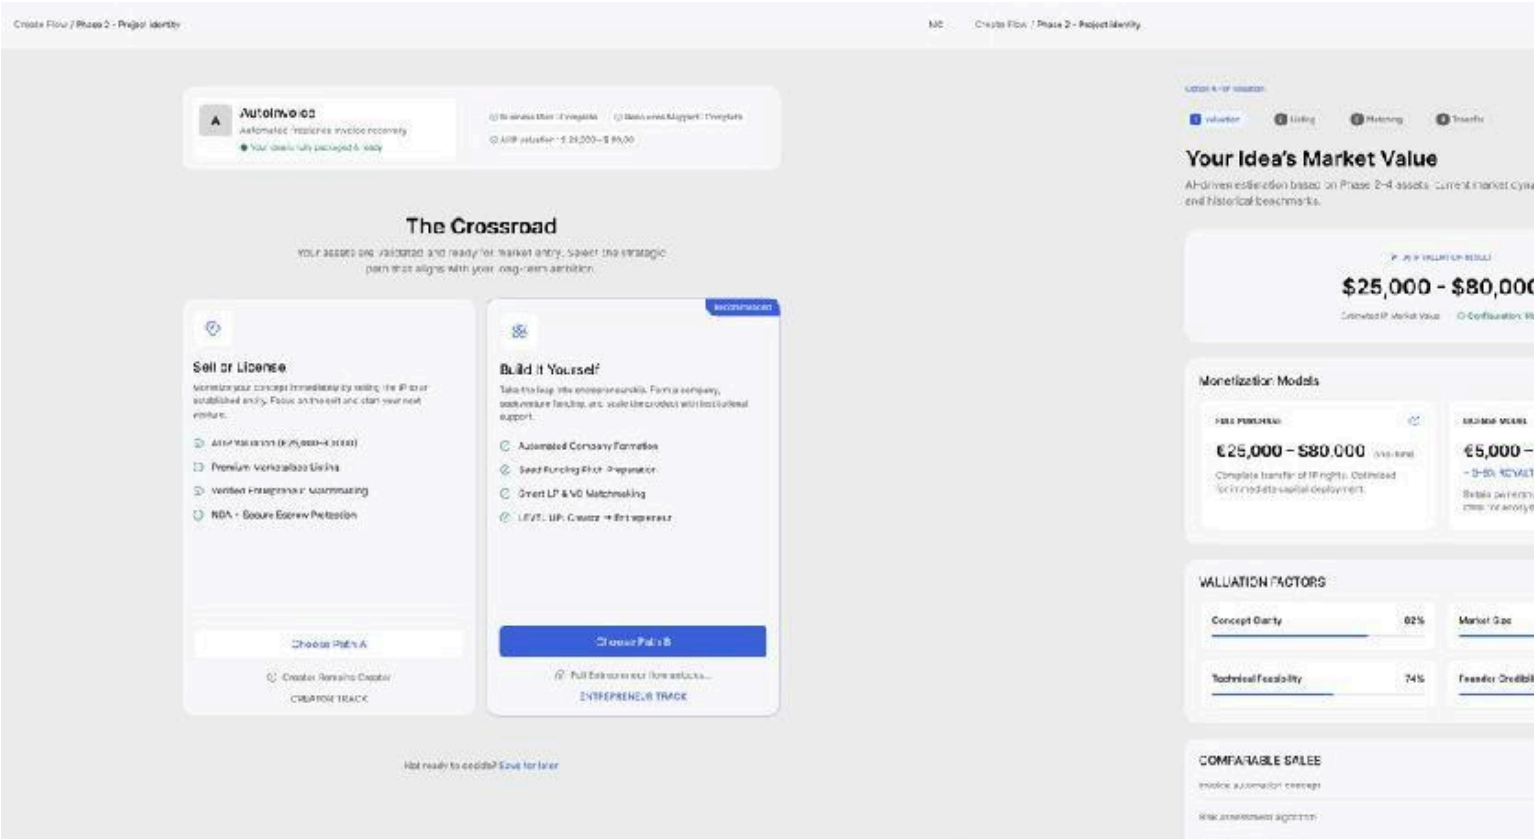

Phase 4- 4.2 AI Resource Calculator.jpg

Phase 4- Step 4.1 Services & Pricing.jpg

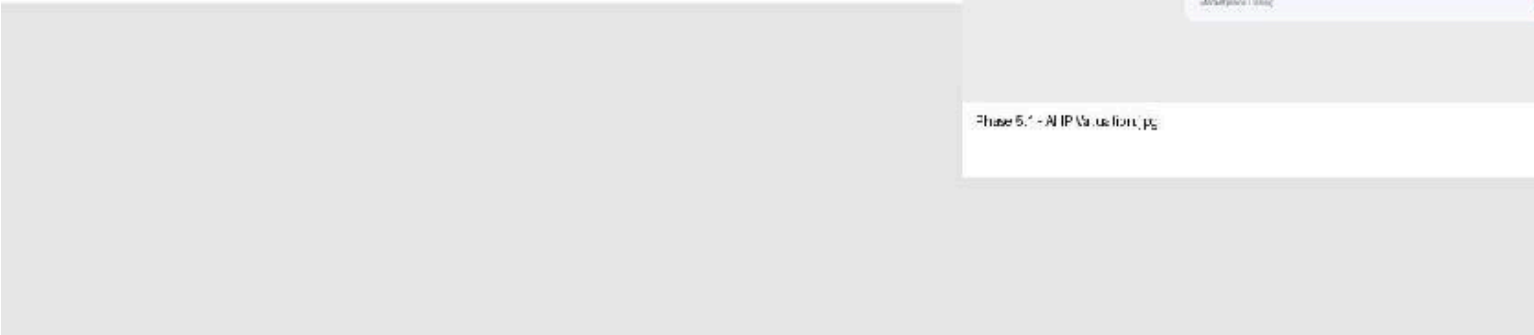

Compressed visual index. Use the original folder image files for detailed implementation.

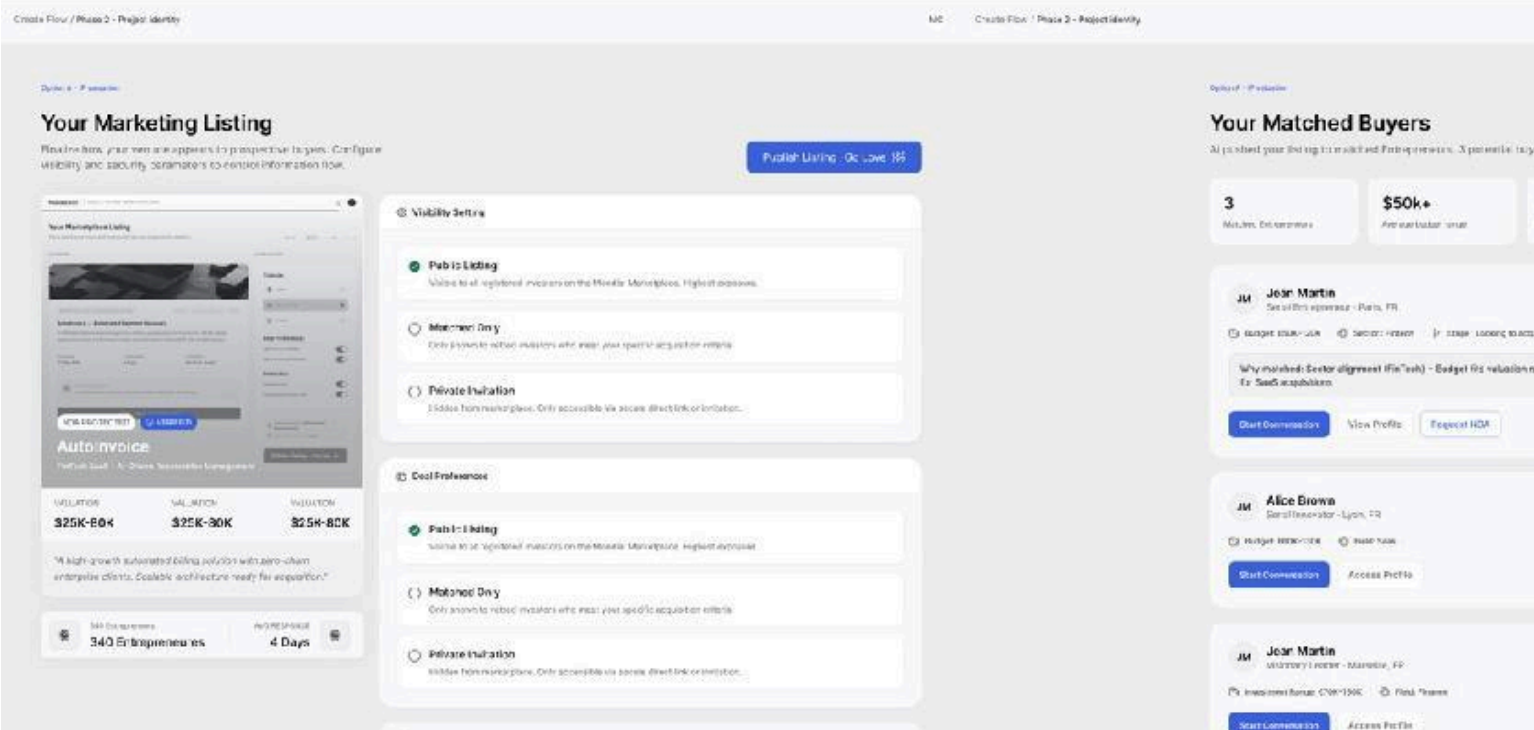

Phase 5 Visual Sequence

Phase 5: The crossroad.jpg

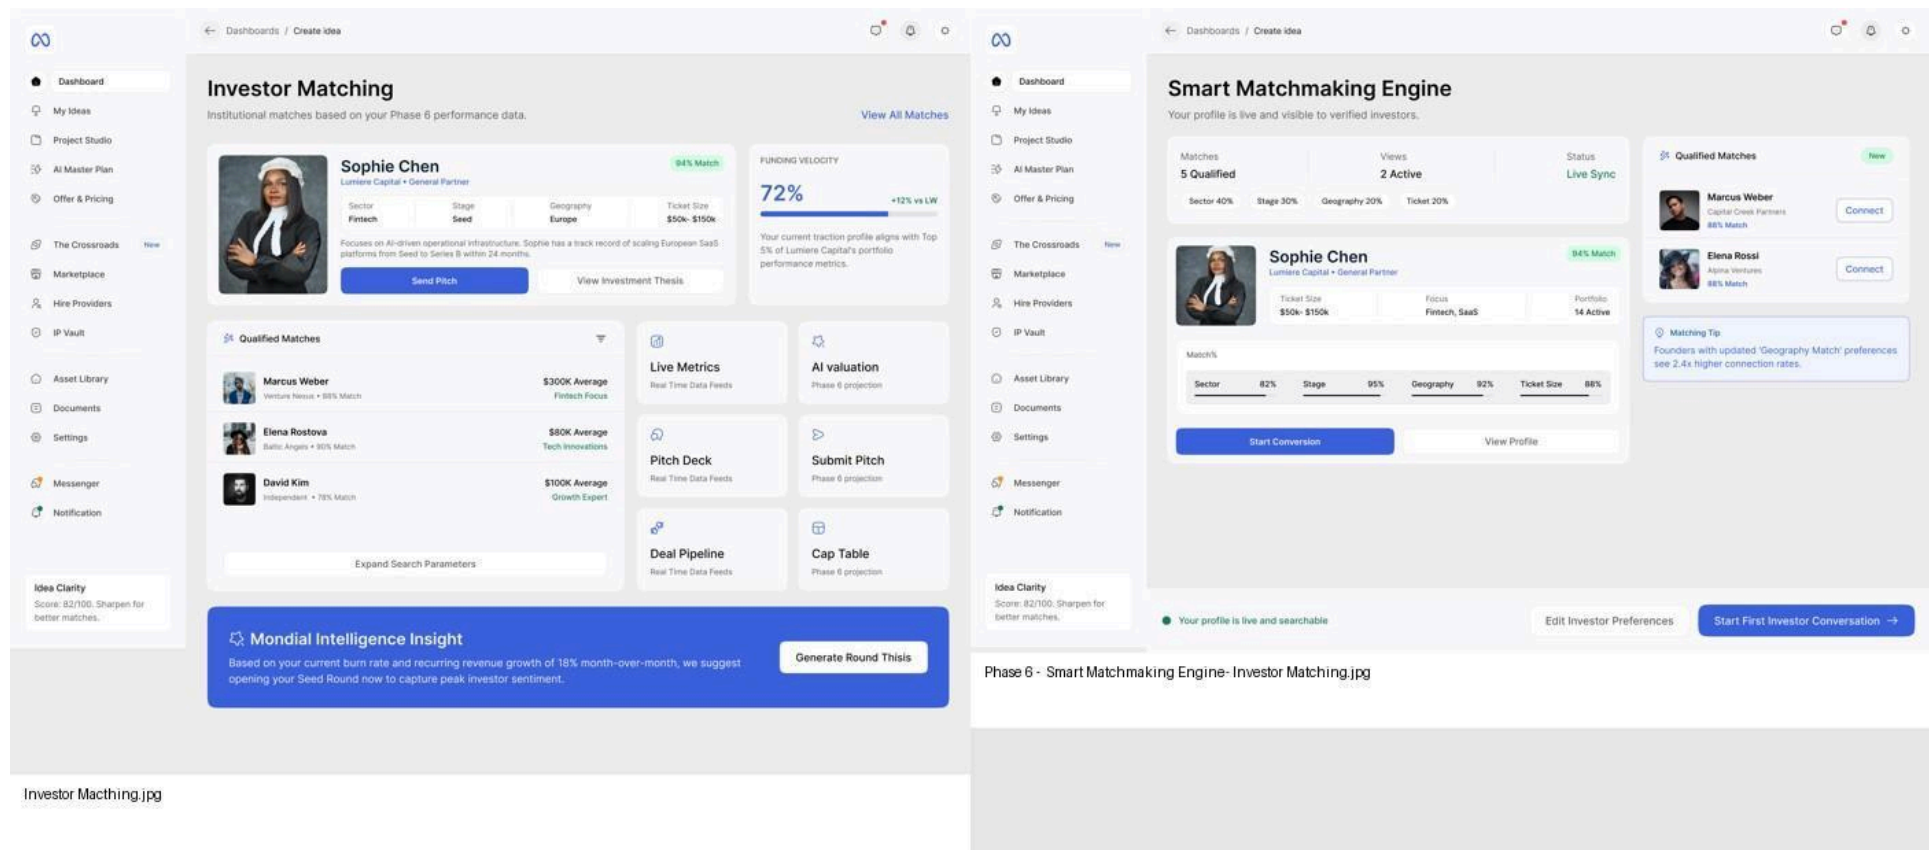

Phase 5.1 - AI IP Valuation.jpg

Compressed visual index. Use the original folder image files for detailed implementation.

Phase 6 Visual Sequence

Compressed visual index. Use the original folder image files for detailed implementation.

Final Instruction

Antigravity must treat this document as the complete specification and should not ask the user to repeat any requirement already defined here.
